NOTE: These categories represent the worst conditions expected each day.

f t @NWSNorman

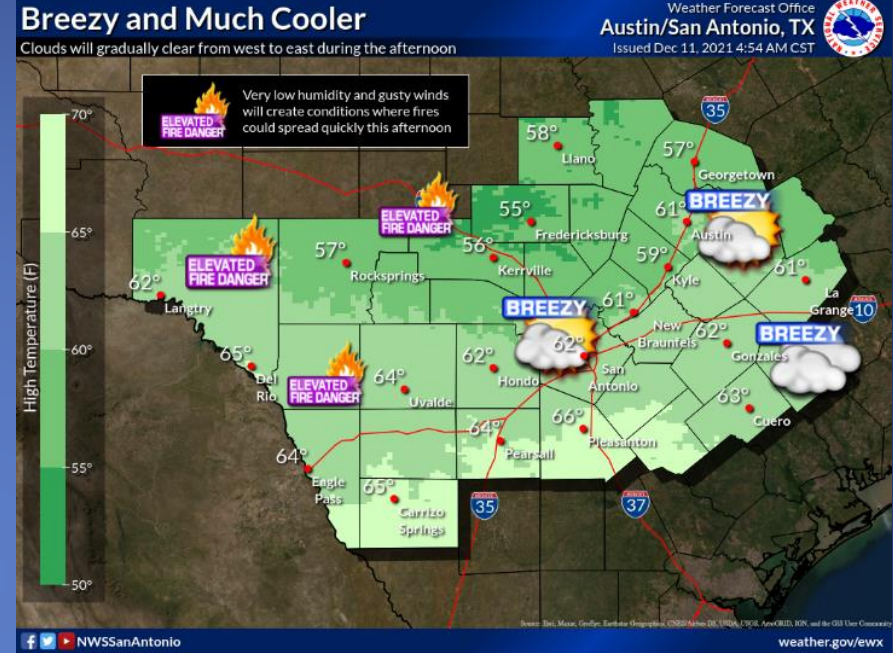

weather.gov/norman

Critical fire weather conditions may develop across western Oklahoma Sunday afternoon. Elevated to near critical fire weather conditions are also possible Tuesday and Wednesday.

Hazardous Weather

A cold front will sweep across the area by early afternoon. Prior to the frontal passage, showers and thunderstorms are expected. Showers and thunderstorms will slowly end after the front passes. Temperatures ahead of the front will be in the 70s then fall into the 60s behind the front. Winds will shift to the north at 10 to 20 mph.

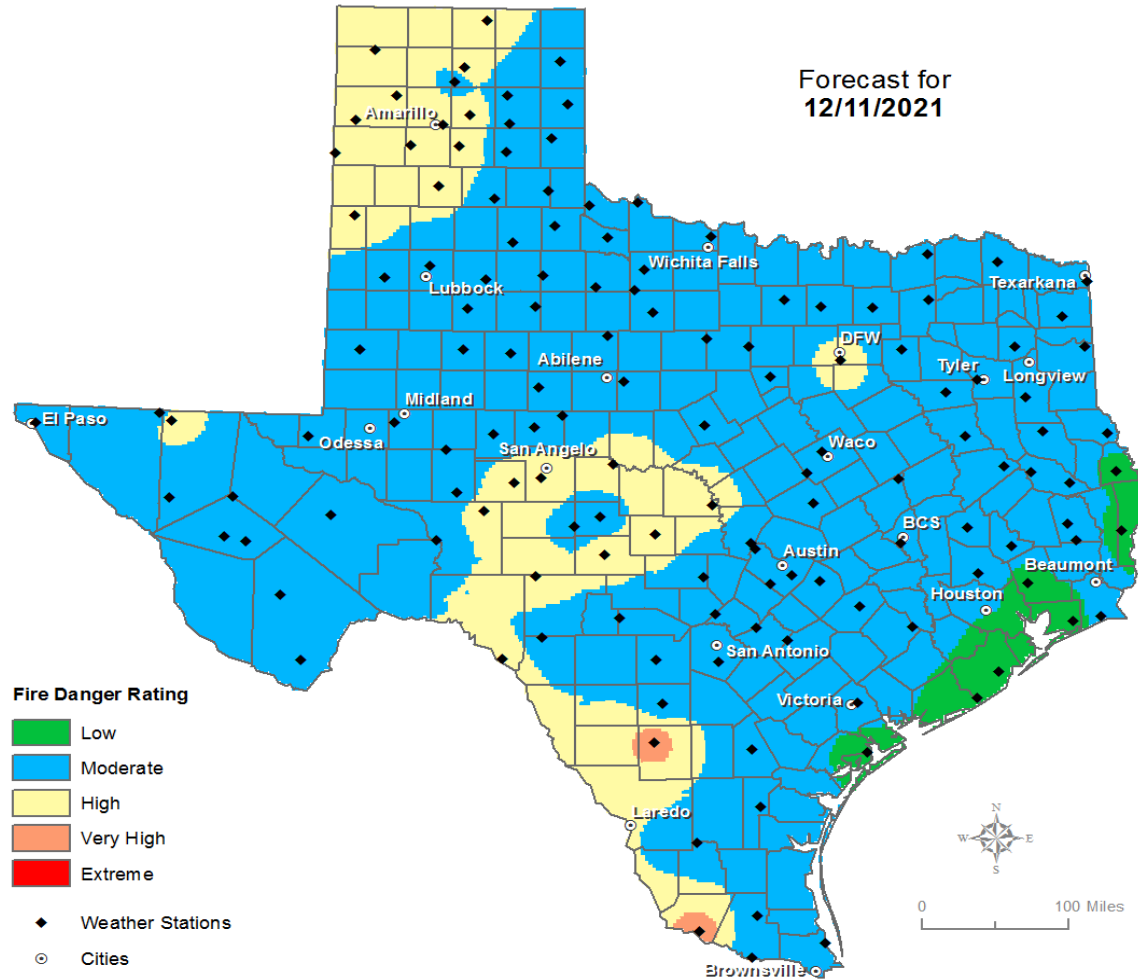

A cold front will have pushed through all of the area this morning bringing much cooler and drier air to the region on Saturday. Breezy conditions will prevail with northerly winds gusting to 30-35 mph. High temperatures will be mainly in the 50s and 60s. The drier air and strong winds will create some hazardous fire weather conditions mainly over the western Hill Country, Edwards Plateau, and Rio Grande Plains. This means that grass fires could spread quickly. Cloudy conditions this morning will gradually clear from west to east during the day.

Weather Warnings/Advisories Issued

DATE	WARNING TYPE	LOCATION
